Insertion algorithm:-

1. Perform BST insert, set col. of new node $x = \text{RED}$
2. If x is root, then col of $x = \text{BLACK}$
3. If color of x 's parent $\neq \text{BLACK}$ or x is not root:
 - a. If x 's uncle is RED
 - i. change parent col & uncle col = BLACK
 - ii. Grandparent col = RED
 - iii. Change x 's col = grandparent's col.
 - b. Else (i.e. x 's uncle is BLACK)
 - a) Determine
 - i. Left-left case
 - ii. left-right case
 - iii. Right-right case
 - iv. right-left case
 - b) Change $x = x$'s parent

Basic structs & nodes:

```
struct Node {  
    int data;  
    bool color;  
    Node *left, *right, *parent;  
  
    Node (int data) {  
        this->data = data;  
        left = right = parent = NULL;  
        this->color = RED;  
    }  
};  
  
class RBTree {  
    private: Node * root;  
    void rotateLeft(Node *u, Node *u1)  
    void rotateRight(Node *u, Node *u1)  
    void fixViolation(Node *u, Node *u1)
```

```

public:
    RBTREE() { root = NULL; }
    void insert (const int &n);
    void inorder();
};

```

Utility functions :

```

Node *BSTInsert (Node* root, Node* pt){
    if (root == NULL) return pt;
    if (pt->data < root->data){
        root->left = BSTInsert (root->left, pt);
        root->left->parent = root;
    } else if (pt->data > root->data){
        root->right = BSTInsert (root->right, pt);
        root->right->parent = root;
    }
    return root;
}

void RBTREE::rotateLeft (Node *&root, Node *&pt){
    Node* pt-right = pt->right;
    pt->right = pt-right->left;
    if (pt->right != NULL) pt->right->parent = pt;
    pt-right->parent = pt->parent;
    if (pt->parent == NULL) root = pt-right;
    else if (pt == pt->parent->left) pt->parent->left = pt-right;
    else pt->parent->right = pt-right;
    pt-right->left = pt;
    pt->parent = pt-right;
}

void RBTREE::rotateRight (Node *&root, Node *&pt){
    Node* pt-left = pt->left;
    pt->left = pt-left->right;
    if (pt->left != NULL) pt->left->parent = pt;
    pt-left->parent = pt->parent;
    if (pt->parent == NULL) root = pt-left;
}

```
